Firma ORGRES OJSC
Attn.: General Director
Mr. V.V. Cherkasov

Belfort, March, 31st 2014

Dear Mr Cherkasov,

From December 2013 to March 2014 the specialists of Firma ORGRES OJSC carried out the Expert Review of the TA 1200-78 type Turbogenerator and brushless Excitation system (Brushless Exciter TKJ167-45 & ES-REDEX-20) in order to confirm the compliance of characteristics of equipment designed by ALSTOM Power Systems SA and supplied by ALSTOM Atomenergomash LLC for Baltic NPP Project with the requirements of the standards of the Russian Federation.

The expertise was carried out in the scope of checking the compliance of the characteristics set forth in the Terms of Reference for the above-mentioned equipment to the requirements of the standards of the Russian Federation.

The results of the expert review included the Conclusion of compliance of the above-mentioned equipment with the requirements of GOSTs and Technical Report with Appendices that include the Comparison Table of the requirements of the Terms of Reference with the applicable requirements to this equipment of current governmental standards of the Russian Federation, as well as several documents of technical character that were the basis of the expert review.

The job was carried out at a high level and within the time frame set forth in the Contract.

We point out a high professional level of specialists of Firma ORGRES OJSC and express gratitude for high quality and timeliness of fulfilled activities and hope to continue fruitful cooperation in future.
